---

### SUMMARY

Experienced Node.js Developer with 2+ years in backend development. Proven track record in creating successful projects. Skilled in optimizing performance and staying updated with latest trends. Looking for opportunities to contribute to innovative projects.

---

### WORK EXPERIENCE

2021 - 2024

#### Software Developer II , Searchingyard Software Pvt. Ltd.

- Contributed to a diverse array of projects spanning across industries such as e-commerce and education.
  - Led and effectively coordinated a team to deliver a complex project on schedule, taking full responsibility for developing the entire backend single-handedly.
  - Guide junior team members in their projects, providing assistance with code optimization and mentoring them along the way.
- 

### EDUCATION

2016 - 2019

#### Bachelor of Science in Mathematics

M.P.C. Autonomous College, Baripada, Odisha

---

### PROJECTS

#### Education ERP Software

- Managed a team of three individuals assigned to develop an Education ERP system for educational institutions and colleges to manage their daily task.
- Participated in client meetings and collaborated with the project manager to design and deploy the backend infrastructure using Node.js, MongoDB, and AWS, taking full responsibility for developing the entire backend.
- Implemented Socket IO, Web RTC, S3 and other technology.

#### Custom CICD Pipeline

- Created a custom CI/CD pipeline for deploying applications primarily on AWS.
  - Implemented GitHub API to trigger builds automatically whenever code is committed to the deployment branch.
-
